

Isi Caulder and Ray Kovarik coauthored an article "Patenting AI – overcoming the natural language processing barrier" by Lexpert

May 14, 2020

Isi Caulder and Ray Kovarik coauthored an article "Patenting AI – overcoming the natural language processing barrier", publishing in the Lexpert Special Edition: Technology 2020.

Artificial intelligence (AI) is transforming daily life with real-world applications such as speech recognition, smart cars, robots and health care. Patent offices worldwide continue to issue patents for AI innovations in ever-increasing numbers. Within the AI patent field, Natural Language Processing-related patent applications are the most prevalent type of AI specialization in both Canada and the U.S., according to the CIPO report on Processing Artificial Intelligence: Highlighting the Canadian Patent Landscape.
